Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 03 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☐ Responsive to communication(s) filed on ____.
- 2a) ☐ This action is FINAL. 2b) ☒ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

- 6) ☐ Other: ____.

DETAILED ACTION

Priority

1. Receipt is acknowledged of papers submitted under 35 U.S.C. 119(a)-(d), which papers have been placed of record in the file.

Specification

2. The lengthy specification has not been checked to the extent necessary to determine the presence of all possible minor errors. Applicant's cooperation is requested in correcting any errors of which applicant may become aware in the specification.

Claim Rejections - 35 USC § 102

3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in a patent granted on an application for patent by another filed in the United States before the invention thereof by the applicant for patent, or on an international application by another who has fulfilled the requirements of paragraphs (1), (2), and (4) of section 371(c) of this title before the invention thereof by the applicant for patent.

The changes made to 35 U.S.C. 102(e) by the American Inventors Protection Act of 1999 (AIPA) and the Intellectual Property and High Technology Technical Amendments Act of 2002 do not apply when the reference is a U.S. patent resulting directly or indirectly from an international application filed before November 29, 2000. Therefore, the prior art date of the

Art Unit: 2871

reference is determined under 35 U.S.C. 102(e) prior to the amendment by the AIPA (pre-AIPA 35 U.S.C. 102(e)).

4. Claims 1-2, 4-5, 7, 9-11, 13-14, 16 and 18 are rejected under 35 U.S.C 102(e) as being anticipated by Ha et al., US Patent No. 6,697,138.

The above claims are anticipated by Ha et al. figure 7 which disclose a transfective liquid crystal display (LCD) device comprising a second substrate (310), a first substrate (opposed to the second substrate), a liquid crystal display therebetween; in which the first substrate having a plurality of projections (unevenness 175), a first insulating film (250), a light reflecting film (181), a color filter / a second insulating film (191), a pixel electrode (200).

Claim Rejections - 35 USC § 103

5. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

6. Claims 3, 8, 12 and 17 are rejected under 35 U.S.C. 103(a) as being unpatentable over Ha et al., US Patent No. 6,697,138.

Regarding the above claims, Ha et al. disclose the claimed invention as described above except for the second insulating film comprising an inorganic film. It would have been an obvious to one having ordinary skill in the art at the time the invention was made to employ an inorganic insulating film in stead of an organic insulating in an LCD device since the examiner takes Office Notice of the equivalence of the inorganic insulating film and the organic layer for

Art Unit: 2871

their use in the LCD art and the selection of any of these known equivalents for insulating purposes would be within the level of ordinary skill in the art.

7. Claims 6 and 15 are rejected under 35 U.S.C. 103(a) as being unpatentable over Ha et al., US Patent No. 6,697,138, in view of Itoh et al., US Patent Application Publication 2004/0075793A1.

Regarding the above claims, Ha et al. disclose the claimed invention as described above except for the second insulating film formed on the color filter. Itoh et al. disclose an insulating transparent film (36) can be formed over a color filter (44)(see figure 5). Therefore, it would have been obvious to one skilled in the art at the time of the invention was made to form an insulating film over the color filter as shown by Itoh et al. in order to provide a transfective LCD which is capable of displaying with a high contrast (see [0007]).

Conclusion

8. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
